

Microsoft Copilot for Project Team and Commercial Team

Trainer: Goh Kheng Yee

TRAINER PROFILE

Trainer Kheng Yee

- HRDC Accredited Trainer
- M.Sc. in Analytics, Georgia Tech, USA
- 6 years of Industrial Experience in AI & Data Science
- Trainings focused on AI, Machine Learning, Python, SQL, Data Analytics, and Data Visualization.

Professional Experience Highlights

Consulting

Led development of AI-powered learner engagement systems for an education institution. Contributed to public sector projects by applying advanced analytical models.

Media

Built AI/machine learning models to identify audience segments, enabling the shift to addressable TV advertising.

Banking

Developed machine learning models for banking products and optimized lead quality through model overlay techniques.

Professional Certificates

HRDC Accredited
Trainer

AWS Certified
Cloud Practitioner

Salesforce Certified
Tableau Desktop
Foundations

Google Cloud
Certified Cloud
Digital Leader

Agenda

- Module 1: Copilot Mindset and Capabilities
- Module 2: The Art of the Prompt – Getting Great Outputs
- Module 3: Copilot Across M365 – Core Applications
- Module 4: Copilot for Data Analysis & Business Insights
- Module 5: Procurement, RFQ and Bid Evaluation
- Module 6: Building AI Agents for Workplace Productivity

Introduction

Introduction to Artificial Intelligence

What is AI?

The science of making **machines** think
and act like **humans**

Key Concept

AI works by analyzing large amounts of **data**, finding **patterns**, and using those patterns to make **predictions**.

Emergence of New AI-related Job Roles

AI Agent
Specialist

GenAI
Engineer

AI
Engineer

Prompt
Engineer

AI in Everyday Life

Popular GenAI Tools

Module 1: Copilot Mindset and Capabilities

Microsoft 365 Ecosystem

- Office Applications
 - Word, Excel, PowerPoint, Outlook
- Collaboration & Communication
 - Microsoft
 - SharePoint
 - OneDrive
- Employee Experience
 - Microsoft Viva
- AI & Copilot
 - Microsoft Copilot

Microsoft 365 Copilot

- <https://m365.cloud.microsoft/>
- Requires Microsoft 365 subscription
- Deep integration with Office apps

Copilot (Consumer)

- <https://copilot.microsoft.com/>
- Built into Windows and Edge
- Web-based answers

Microsoft 365 Copilot vs Copilot Chat

Feature	Microsoft 365 Copilot (BizChat)	Copilot Chat (Consumer)
Access	Requires Microsoft 365 Work/School account	Available to anyone
Data Sources	Work files, emails, meetings	Web search, general chat
Security	Enterprise Data Protection (EDP)	No EDP
UI Experience	Business-focused	More vibrant and conversational

What Copilot CAN Do

1. Summarize Large Documents
2. Support Technical & Commercial Evaluation
3. Generate Reports & Presentations
4. Analyze Data in Excel
5. Improve Communication

What Copilot CANNOT Do

1. Replace Human Judgement
2. Guarantee Accuracy
3. Understand Business Context Automatically
4. Replace Risk Assessment
5. Think Like an Engineer or Project Manager

Module 2:
The Art of the Prompt –
Getting Great Outputs

What is Prompt Engineering?

- Prompt engineering is the practice of crafting effective instructions so AI tools can generate high-quality outputs.
- The skill of giving clear instructions to AI.

Prompting Engineering

Teaching AI how to
think before it answers

Prompt = the
instruction you give
to AI

Better prompts =
Better outcomes

How LLMs interpret prompts?

Large Language Model (LLM)

- An LLM is a type of artificial intelligence program, built on a deep learning architecture, that has been trained on a **massive amount of text data**.
- Its primary function is to **process, understand, and generate natural human language**.

Write a short poem about a cat that loves the sun.

Example

A customer service officer wants to reply to a customer politely but doesn't know how to phrase it professionally.

Bad Prompt: “Help me write an email.”

Structure of A Prompt

- The task (what you want)
- The context (background information)
- The format (table, email, summary)
- The tone (formal, simple, friendly)
- The constraints (word limit, no assumptions)
- The input (excel file, photo, screenshot)

Example

- **Task:** Rewrite my message into a professional customer service email.
- **Context:** I'm responding to a customer who complained about slow delivery.
- **Tone:** Polite, empathetic, and professional.
- **Format:** Short email.
- **Constraints:** Keep it under 120 words. No promises of guaranteed delivery.
- **Input:** Client's email: "My parcel still hasn't arrived. This is very slow. What's happening?"

Scenario 1

You received a Technical Evaluation Report containing:

- bidder comparison
- vessel capability assessment
- operational concerns
- geopolitical risks

Management wants a concise summary.

Bad Prompt: "Summarize this report"

Scenario_1_TER.docx

Scenario 2

Procurement team wants to identify abnormal pricing from vendor submissions.

Bad Prompt: “Analyze the pricing.”

Scenario_2_CBE.xlsx

Scenario 3

Project team wants to understand the impact of bidder exceptions submitted during tender clarification.

Bad Prompt: "Check these exceptions."

Scenario_3_Exceptions.docx

Types of Prompts

Zero-shot vs.
Few-shot
prompting

Chain-of-
Thought (CoT)
prompting

Role-based
prompting

Zero-Shot Prompting

- Asking AI to perform a task directly without giving examples.
- Common tasks, simple summarization, translation, generating standard text, or answering general knowledge questions.

Few-Shot Prompting

- Providing AI with a few examples before asking it to perform the task.
- The examples help AI understand:
 - Desired format
 - Writing style
 - Expected analysis depth
 - Output structure

Few-Shot Prompting

Rewrite this using the friendly style:

Original: “Your form is incomplete.”

Example 1:

Original: “Send me the report now.”

Friendly: “Could you please share the report when you have a moment?”

Example 2:

Original: “You didn’t follow the instructions.”

Friendly: “I noticed a few steps were missed, can we review them together?”

Scenario 4

You are supporting a project manager reviewing offshore installation bidders. Use few-shot prompting to generate simple and consistent technical evaluation comment for a new bidder based on the examples provided.

New Bidder: “Bidder C complies technically but carries geopolitical concerns related to vessel flag state.”

Scenario 5

You are preparing executive-level tender evaluation comments for management review. Follow the EXACT writing structure, tone, and sentence pattern shown in the examples when generating the final answer.

Required Output Structure:

[Bidder Name] + [overall assessment].

However, [key concern] + [business impact/action required].

Original comment: “Bidder C is technically acceptable but carries moderate geopolitical risk.”

Chain-of-Thought (CoT) Prompting

- You ask the AI to “show its working steps” instead of just giving the final answer.
- You’re not changing the *answer*, you’re changing the *way it thinks out loud for you*, asking AI to:
 - Break down the task
 - Analyze information in stages
 - Explain the logic clearly
 - Produce a structured conclusion

Chain-of-Thought Prompting

No CoT:

“What is 24×17 ?”

CoT:

“What is 24×17 ?

Show your calculation step-by-step before giving the final answer.”

Chain-of-Thought Prompting

- “Explain your reasoning step-by-step.”
- “Think through this like a checklist before answering.”
- “Show how you arrived at the conclusion.”
- “Review the vendor proposal step by step, and conclude whether the proposal is technically acceptable”

Scenario 7

- Management wants to decide which bidder should proceed for recommendation.
- Original Prompt: “Compare Bidder A, Bidder B, and Bidder C”
- *Reference: Scenario_7_COT.xlsx*

Role-based Prompting

Role-based prompting means you **assign a role** to the AI so it knows *how to think*, *what expertise to use*, and *how to behave* before completing the task.

Role-based Prompting

Prompt: “Act as a **Relationship Manager**. Reply the message below in a polite and reassuring manner suitable for a customer.

Message from Customer: ‘Why is my loan taking so long?’”

Role Options (you can swap):

- Customer Service Representative
- HR Executive
- Technical Support Agent
- Professional Writer

Scenario 8

You are reviewing offshore installation bidder proposals for management discussion. Rewrite the SAME prompt using different professional roles. Only change the role perspective while keeping the task and structure consistent.

Role_Based_Prompting_Practice_Data.docx

Using Templates & Placeholders

- Allow you to create **standardized prompts** that are easy to reuse, share, or scale.
- **Why?** Ensures consistency.

Using Templates & Placeholders

Act as a Business Analyst.
Generate a Monthly Sales
Performance Report using the data
below.

Structure:

1. Executive Summary (3 to 4 lines)
2. Key Highlights (3 pointers)
3. Challenges / Risks
4. Opportunities
5. Recommendations for Next Month

Placeholders:

- Month: [MONTH]
- Total Sales: [TOTAL_SALES]
- Growth: [GROWTH]
- Top Product: [TOP_PRODUCT]
- Lowest Product: [LOWEST_PRODUCT]
- New Customers: [NEW_CUSTOMERS]
- Lost Customers: [LOST_CUSTOMERS]

Constraints:

- Professional tone
- 200–250 words
- No assumptions outside the data provided

AI-Assisted Prompting

- “Review the response you just generated and check whether any improvements are needed.”
- “Help me write a prompt to do task A.”

Techniques to reduce hallucination

- “verify this”
- “cite source”

RICE Framework

Component	Purpose
R — Role	Tell Copilot who it should act as
I — Intent	Define the task/objective
C — Context	Provide supporting information
E — Example	Show desired output style

RICE Example

Role

- “Act as a project procurement evaluator.”

Intent

- “Summarize the technical and commercial concerns.”

Context

- “This document is a Technical Evaluation Report for offshore installation works.”

Example

- “Present findings in a management summary table.

Module 3: Copilot Across M365 – Core Applications

Microsoft Teams with Copilot

Meeting Prompt Guide

Transcription & summary prompts

- Give me a summary of this meeting in bullet points, grouped by topic.
- Show me the full transcript of this meeting.
- Translate the meeting transcript into Bahasa Malaysia.
- Summarise the meeting in Bahasa Malaysia.

Action items & follow-ups

- List all action items from this meeting with the owner and deadline for each.
- What are the most time-sensitive tasks from this meeting?
- What did each of the attendees commit to do after this meeting?
- Was a next meeting date agreed? If so, what was it?

- **Decisions & risks**

- What key decisions were made in this meeting?
- What risks or blockers were discussed? How were they resolved?
- Were there any unresolved questions or open issues at the end of the meeting?

Meeting Prompt Guide

Live Catch-up

- What have I missed so far?
- What has been discussed in the last 10 minutes?
- What decisions have been made before I joined?
- Has my name been mentioned?
- What is currently being discussed?

Sentiment analysis

- What was the overall tone of this meeting?
- Did any part of the meeting seem tense or uncomfortable?
- Was there disagreement between the participants at any point?
- Did the meeting end on a positive note?

Microsoft Outlook with Copilot

Email Prompt Guide

Draft emails & documents

- Draft a follow-up email to all meeting participants summarising the key points and action items.
- Draft an escalation email to XXX about the mentioned issue, based on what was discussed in the meeting.
- Create meeting minutes in a formal format including attendees, agenda, discussion points, decisions, and action items.
- Write a short project status update suitable for sending to the steering committee based on this meeting.

Email Prompt Guide

Writing style replicator

- I have a sample recap email below. Analyse its format, tone, writing style, sentence structure, and level of formality. Then write a reusable prompt that I can use to instruct you to generate a new recap email in exactly the same style for a different meeting.
- Analyze the following text, and give me a set of instructions I can use to write exactly in the same tone, writing style, reading level and delivery.

Email Prompt Guide

Email Analysis & Intelligence

- *[Chronological Timeline Extraction]* Review the email thread and create a chronological timeline of all important events, communications, decisions, and action items.
- *[Decision Log]* Identify all decisions made throughout the email conversation. For each decision, specify when it was made, who made or approved it, supporting context, and any follow-up actions required.
- *[Action Item Tracker]* Extract all action items from this email thread. For each item, identify the task, owner, due date, current status, and dependencies. Present the output as a tracking table.
- *[Change Request Detection]* Identify any requests that indicate changes in scope, requirements, timelines, deliverables, budgets, or responsibilities. Summarize each change and its potential implications.

Microsoft Word with Copilot

Document Productivity Prompt

- Draft a proposal for [project/service]. Include objectives, scope, deliverables, timeline, assumptions, and expected benefits.
- Summarize this document into a one-page executive summary highlighting key insights, risks, and recommendations.
- List every decision made in this document and explain its business impact.
- Identify all action items, responsible parties, and deadlines mentioned in this document.
- Suggest five ways to improve the quality and completeness of this document.
- Identify duplicated information and recommend sections that can be merged.

Microsoft Excel with Copilot

Excel Analysis Prompts

Data Preparation Prompts

- Clean this dataset by removing duplicates, correcting inconsistent formatting, filling missing values where appropriate, and standardizing date and number formats.
- Suggest calculated columns that would provide additional business insights.
- Recommend the most effective PivotTables and PivotCharts for exploring this dataset.
- Explain how to use this dataset to answer common business questions.

Business Analysis Prompts

- Analyze sales performance by product, region, and salesperson. Highlight the top performers, underperformers, growth opportunities, and key business insights.
- Segment customers based on purchasing behavior and identify the characteristics of high-value customers.

Microsoft Power Point with Copilot

Presentation Slides Prompt

- Suggest charts, SmartArt, timelines, or diagrams to better visualize the information on each slide.
- Reorganize the slide sequence into a more logical storytelling flow with smooth transitions between topics.
- Review this presentation and identify missing content, inconsistencies, duplicate information, and opportunities for improvement.

Module 4: Copilot for Data Analysis & Business Insights

Copilot as Your Analysis Partner

- Explore datasets quickly
- Explain unusual trends
- Identify patterns and outliers
- Suggest follow-up questions
- Draft executive summaries
- Prepare decision-ready outputs

Copilot as Your Analysis Partner

Module 5: Procurement, RFQ and Bid Evaluation

Hands-on Tutorial

Module 6:

Building AI Agents for

Workplace Productivity

GenAI vs Agentic AI

GenAI

**one answer at a
time**

AI Agent

**multiple steps
until the job is
done**

Agentic AI

- Agentic AI refers to AI systems that don't just *respond* to prompts, but can plan, decide, and act autonomously to achieve goals

Building Blocks of an AI Agent

- Goals
- Rules
- Memory
- Tools
- Data

Goals

- A *goal* is the final outcome you want the agent to achieve.

Examples

- “Book a dental appointment for the customer.”
- “Prepare the weekly sales summary.”

Rules

- Rules control the agent's behaviour.
- Rules = traffic laws for the agent.
- They prevent chaos, mistakes, or incorrect actions.

Examples

- “Only schedule appointments between 9am–6pm.”
 - “Do not send reminders to VIP customers.”
- 

Memory

- Memory helps the agent behave consistently and intelligently.
- Agents do not “magically know everything.” They must be *given* data.

Examples

- Short-Term Memory
 - Long-Term Memory
 - External Memory (Databases/Sheets/Notes)
- 

Tools

- Tools allow the agent to interact with the real world.
- Data Tools, Communication Tools, Scheduling Tools etc

Data

- Agents need accurate and clear data.
- If any item is missing → agent gets confused or stops.

Example (Scheduling Agent):

- Customer name
 - Preferred date
 - Opening hours
-
